About Me

Enthusiastic Master's in Computer Engineering student with a passion for data, AI, and analytics, I bring a versatile skill set in SQL, Python, R, and Tableau, backed by a Google Data Analytics certification. At Åbo Akademi University, I designed a Python-based tool to analyze network patterns, sparking my drive to uncover insights through data. Awarded Best IT Solution (2023) among 41 peers, I thrive on delivering innovative, impactful solutions. Fluent in English and actively improving my Finnish, I'm eager to collaborate on Solita's data-driven projects, contributing my analytical mindset and collaborative spirit to create lasting value.

Technical Skills

- **IT Support:** Active Directory, Inventory and Asset Management, Azure Active Directory, Office365 administration, VMware, ServiceNow, GitHub, Microsoft Office Suite, Team Viewer, Linux Administration
- **Web Development:** HTML5, CSS, JavaScript, React, Bootstrap
- **Data Analysis:** Google Sheets, SQL, R, Python, Tableau
- **Soft Skills:** Communication, Leadership, Project Management, Customer-Service

Achievements

REIDAR HAGLUNDS FUND (Åbo Akademi University) - 2023

- Awarded with the faculty-specific scholarship

Best IT Solution (Åbo Akademi University / ICT Showroom) 2023

- Finalist among 41 participants, won Best IT Solution award showcasing tech excellence.

Languages

- **Nepali:** Native
- **English:** Working Proficiency
- **Finnish:** Intermidiate

Certifications

- **Google Data Analytics Certification** - Coursera
- **Google Project Management Certification** - Coursera
- **IT Technical Support Certificate** - IBM SkillBuild

Professional Experience

Research Assistant

December 2022 - February 2023
Turku, Finland

Åbo Akademi Univeristy | Veri Devops

Key responsibilities:

- Initiated the design of a Python-based CLI tool for early detection of network attacks, collaborating with a team. This project involved developing an algorithm for real-time network traffic patterns.
- Tested the previous tool that already existed and documented the changes needed.
- Collaborated with supervisors and advisors on creating detailed documentation of research findings, methodologies, and usage instructions to support ongoing network security efforts.

Team Coach

April 2022 - August 2022
Helsinki, Finland

Swappie Oy

Key responsibilities:

- Led the Production specialist team, ensuring quality in second-hand mobile device testing.
- Streamlined processes, minimized waste, and coached team for enhanced performance.
- Executed strategic improvements, aligning production goals with cross-functional teams to exceed targets.

Test Engineer

September 2021 - January 2023
Remote

Marquishtech

Key responsibilities:

- Conducted mobile manual network tests (LTE, 5G, Wi-Fi) for optimal device performance.
- Collaborated on test case development, result analysis, and product improvement.
- Committed to continuous learning, and delivering customer-centric products.

Projects

- **tQit - A Queuing System**

  Developed a **digital queuing app as a Project Manager and Front-End Designer, l**eading a team of six to win "**Best IT Solution" at ICT Showroom 2023 (out of 38 teams)**. Managed Agile workflows **(Scrum, Kanban)** to ensure timely delivery of a functional prototype. Designed an intuitive front-end using HTML5, CSS, and JavaScript, enhancing user experience and optimizing customer flow.

- **Network Analysis - Relationship Finder (Breaking Bad Series)**

  Designed and implemented **"Breaking Bad Relationship Finder,"** a **network analysis tool** for uncovering and understanding intricate relationships within datasets. Enhanced data science skills and delivered actionable insights in a dynamic project environment.

- **Webscraping to know the best flights**

  This project consists of work with **web scraping, data processing, exploratory data analysis, and user interaction.**

Educational Background

- **Åbo Akademi University** — 2022- Present

  MSc. (Tech) - Computer Engineering

- **Centria Univeristy of Applied Science** — 2017- 2020

  Bachelor of Engineering, Information Technology
